

UMSL CS 4220 2021 Summer Semester Assignment 7

Tasks

- Write a ViewController class that programmatically adds a UITextField and UILabel to its view.
- When a user enters text into the UITextField, the UILabel displays the text being entered backwards.

// EXAMPLE: –

- A user enters the text “Hello”.
- The UILabel updates it’s text to read “olleH”.

// HINT: – Create an Xcode project to complete and test your work.

Submission

- Zip all files into a folder named for your SSOID.
- Submit the assignment via Canvas.
