

UMSL CS 4220 2021 Summer Semester Assignment 5

Tasks

- Use the provided `ViewController.swift` file to programmatically add, constrain, and implement a `UITableView` using `AstrologicalSign.allCases` as a data set.

// HINT: – Create an Xcode project to complete and test your work.

Submission

- Rename `ViewController.swift` to your SSOID.
- Zip the file.
- Submit the assignment via Canvas.
